PROFESSIONAL SUMMARY

Enthusiastic Artificial Intelligence & Data Science undergraduate pursuing a final-year B.E. at Coorg Institute of Technology with a strong foundational in **Python, Data Science, Machine Learning and Big Data Analytics**. Experienced in **developing AI-Powered applications**, including a **Smart Resume Screening System**, and currently building **AIRA- Adaptive AI Voice Interview Assistant**, an intelligent platform for interview training and skill enhancement using conversational AI.

EDUCATION

Coorg Institute of Technology <i>Bachelor of Engineering (B.E.) in Artificial Intelligence & Data Science; CGPA: 7.0</i>	Ponnampete 2023 – Present
Maharani's PU College <i>Pre-University Course (PUC); Score: 50%</i>	Mysore 2023
Adarsha High School <i>Secondary School Leaving Certificate (SSLC); Score: 75%</i>	Malavalli 2021

TECHNICAL SKILLS

Programming: Python, C (Basics)
Databases: MySQL, MongoDB
Data Visualization: Power BI, Tableau
Tools: Google Colab, Jupyter Notebook, Anaconda, VS Code, Flutter, Eclipse IDE, Git, GitHub
Core Competencies: Data Structures, Machine Learning, Deep Learning Fundamentals, Big Data Analytics (Basic)

PROJECTS

Smart Resume Screening System Python, Machine Learning, NLP, MongoDB/MySQL - Developed an AI-powered resume screening platform that automates candidate resume analysis, information extraction, and intelligent summarization using Natural Language Processing (NLP). - Implemented machine learning techniques to evaluate resumes against job requirements and generate structured candidate insights, improving the efficiency of the recruitment process. - Integrated an automated email notification system that sends concise candidate summaries, key skills, qualifications, and screening insights directly to HR, enabling faster and more informed hiring decisions. https://github.com/vishruthapanchakshari/Smart-Resume-Screening-System
An AI-Powered Platform for Interview Training and Skill Enhancement - Developing an intelligent voice-based interview platform that simulates real-world technical and HR interviews using conversational AI and adaptive questioning. - Integrating speech recognition, Natural Language Processing (NLP), and Generative AI to evaluate candidate responses, communication skills, and domain knowledge while providing personalized feedback. - Designing an AI-driven assessment engine to analyze interview performance, identify strengths and improvement areas, and generate actionable recommendations to enhance interview readiness.

CERTIFICATIONS & TRAINING

CERTIFICATIONS - INFOSYS SPRINGBOARD: NETWORK SECURITY THREATS AND THEIR IMPACT (NOV 2025) - INFOSYS SPRINGBOARD: IMPLEMENTING DEEP LEARNING: OPTIMIZED DEEP LEARNING APPLICATIONS (NOV 2025)
TRAINING & WORKSHOPS - ONE-DAY TRAINING ON FUNDAMENTALS OF DATA STRUCTURES AND ITS APPLICATIONS. - WORKSHOP ON CYBER SECURITY IMPLICATIONS AND DEFENCES – CONDUCTED BY EYESEC CYBER SECURITY SOLUTIONS PVT. LTD. (AUG 2024).
